

Rajeev Dahiya — MERN Stack Developer — Backend & Frontend Expertise

📞 +91-6263141132 • ✉️ rajeevdahiya435@gmail.com
in linkedin.com/in/rajeev-dahiya • 🌐 github.com/rajeev-dahiya

Career Objective

Enthusiastic and detail-oriented MERN Stack Developer skilled in building scalable, user-friendly, and high-performance applications. Strong foundation in backend services, responsive UI, and database optimization. Passionate about problem-solving, with 300+ LeetCode solutions and proven ability to deliver impactful projects in collaborative environments.

Technical Skills

Frontend: React.js, Redux, React Router, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Microservices

Databases: MongoDB, Mongoose, MySQL, Query Optimization

Languages: JavaScript (ES6+), C++, Python, SQL

Tools: Git, Postman, Docker, Firebase, Cloudinary, VS Code, Jira

Other: DSA, API Performance Tuning, CI/CD Basics, Event-driven Architecture

Experience

Inventurs

MERN Stack Developer

Aug 2025 – Present

- Contributed to the FASTag project, developing and integrating APIs to support seamless toll and payment services.
- Worked on the MaaBharti project, building service APIs and ensuring smooth API integrations with third-party systems.
- Designed and deployed multiple RESTful APIs, ensuring scalability, security, and high performance.
- Collaborated with team members to implement backend solutions and troubleshoot integration issues, improving system reliability.

Sree Aaraviraj Pvt. Ltd. (Inser Technology–Sayonara)

MERN Developer Intern

Jan 2025 – Apr 2025

- Developed full-stack modules for internal dashboards using React (frontend) and Node.js/Express (backend).
- Boosted API performance by optimizing queries and implementing caching strategies, improving load time by 35%.
- Collaborated in agile sprints with cross-functional teams to ensure on-time feature delivery.

Key Projects

Chat Web App: MERN, Socket.io, JWT

- Built a real-time chat application supporting secure user authentication and WebSocket scalability.
- Enhanced engagement with responsive UI and live messaging.
- **GitHub:** chat-app

Your Estate Platform: MERN, Firebase, Cloudinary

- Designed a property platform with advanced filters, responsive dashboards, and secure authentication.
- Integrated Google OAuth, Cloudinary for optimized image uploads, and role-based access control.
- **GitHub:** real-estate-app

Video Fetcher Backend: Node.js, YouTube API, Docker

- Engineered a backend service for fetching/storing YouTube videos using cron jobs.
- Built paginated, searchable APIs with Dockerized deployment for seamless scalability.
- **GitHub:** video-fetcher-backend

VideoTube Backend: Node.js, Multer, MongoDB, JWT

- Developed APIs for video upload, streaming, analytics, and subscriptions.
- Secured routes using JWT and middleware-based request validation.
- **GitHub:** video-tube-backend

Education

IES IPS Academy, Indore

B.Tech – Computer Science

CGPA: 7.0 / 10

2020 – 2024

Problem Solving & Competitive Programming

- Solved 300+ problems on LeetCode focusing on arrays, strings, linked lists, and algorithmic problem-solving.
- Completed the 30-day coding challenge on Hackerrank.
- Strong knowledge of DSA, algorithms, and design patterns relevant to full-stack development.
